SUBJECT: Heartbox v0.1.0 release memorandum
REF: CHANGELOG.md [0.1.0], github.com/f00-sh/heartbox

This memorandum covers Heartbox version 0.1.0 only. Heartbox ships as a hand-tinted Technicolor dark theme pack: one canonical palette, many application ports, and product site heartbox.f00.sh.

1. Summary

v0.1.0 is the first public f00 product release of Heartbox. Operators and users install theme files per application under themes/. The palette encodes warm hospital-night blacks, poppy red hero accent, verse-sky blue, cream foreground, and required cool silver metal (#B8C0C8).

2. Added

- Canonical palette (JSON/CSS/TOML/YAML/SCSS)
- scripts/generate-themes.py port generator
- 45+ app ports (terminals, editors, shells, bars, CLIs)
- themes/TEMPLATE.md for community ports
- Product site site/ on Cloudflare Pages project f00-heartbox
- Custom domain heartbox.f00.sh
- Docs pack: SOP, this memo, man, file_id.diz, CHANGELOG

3. Changed

Not applicable - first release.

4. Fixed

Not applicable - first release.

5. Security

No authentication surface. Theme files are static configuration only. Do not commit secrets. Cloudflare tokens stay in GitHub Actions secrets.

6. Upgrade / install

6.1 Browse <https://heartbox.f00.sh> for palette and port list.

6.2 git clone <https://github.com/f00-sh/heartbox.git> && copy themes/<app>/ as needed.

6.3 Maintainers: python3 scripts/generate-themes.py after palette edits.

6.4 Deploy operators: npx wrangler pages deploy site --project-name=f00-heartbox --branch=main

7. Verification

- palette/heartbox.json contains silver #B8C0C8
- python3 scripts/generate-themes.py exits 0
- Open site/index.html; swatches render 13 tokens
- <https://heartbox.f00.sh> returns 200 after cert ready
- Sample port (kitty/alacritty) loads without missing keys
